

AIONUS Autonomous Sales & Growth Agent Setup

Step-by-Step Guide to Installing Google Antigravity 2.0 & Launching Your Personalized AI Partner

How This Works: You do not need to write prompts or configure files manually. Once you install Google Antigravity 2.0, you simply paste one sentence pointing to the official AIONUS GitHub repository. Your AI will clone the full workspace (including all 16 sales & LinkedIn skills), ask you what you want to name it, personalize itself for you, and handle lead scraping, cold call scripts, DMs, emails, and automatic reporting.

Step 1: Install Prerequisites & Google Antigravity 2.0 (5 Mins)

- 1. Install Node.js (v20 LTS or newer) & Python (3.10+): Download from <https://nodejs.org> and <https://www.python.org/downloads/> (On Windows, check 'Add Python to PATH' during installation). Also ensure Git is installed (<https://git-scm.com>).
- 2. Download Google Antigravity 2.0: Go to <https://antigravity.google/download>, install the app for your OS (macOS, Windows, or Linux), and sign in with your Google account.
- 3. Create Your Workspace Folder: Create a clean folder on your computer named AIONUS-Growth and open it inside Google Antigravity (File -> Open Folder).
- 4. Recommended Execution Mode: In Antigravity settings, select Agent-Assisted (Autopilot for Safe Commands) so your AI can run lead verification and scraping scripts smoothly.

Step 2: Paste This 1-Sentence Setup Command into Antigravity Chat

Open the Antigravity chat panel (Cmd+L on Mac / Ctrl+L on Windows) and paste this exact line:

Clone <https://github.com/Hashim1404/aionus-growth-agent> into my workspace, read README.md, and run the interactive setup wizard for me.

Step 3: Answer the 6 Quick Personalization Questions from Your AI

As soon as your AI clones the repository, it will greet you and ask you 6 quick questions to configure itself:

- 1. Your Name & Your AI's Name: You get to name your own AI partner (e.g., Jarvis, Atlas, Nova, Vivaan, etc.).
- 2. Your Role Title at AIONUS: e.g., Growth Partner at AIONUS or Business Development at AIONUS.
- 3. Your Signature Contact Info: Your phone number and email address for outreach signatures.
- 4. Your Operating System: macOS, Windows, or Linux (so it configures the right file paths automatically).
- 5. Your Focus Channels: Cold Calling, Cold Email, LinkedIn, and/or Instagram DMs.
- 6. Your Personal Goals & Style: Alongside AIONUS sales work, your AI also acts as your personal mentor and productivity assistant to help you level up your skills and daily workflow.

Step 4: Grab Your Free-Tier Scraping & Reporting API Keys (₹0/Month)

Your AI will ask you for these free API keys and automatically wire them into your .env and mcp_config.json:

Tool / MCP Server	Free Tier Included (₹0/mo)	What Your AI Uses It For	Where to Get Free Key
Apify (Compulsory)	₹0/mo (\$5 free credit every month)	Mass scraping phone numbers for cold calling, Google Maps, directories, and LinkedIn post engagers.	https://console.apify.com/sign-up
AgentMail (Recommended)	₹0/mo Free Agent Inbox	Automatically emails Warm Lead Handoffs & Daily Reports straight to Rias (rias@agentmail.to).	https://console.agentmail.to
Tavily + Exa	1,000 searches/mo + \$10 credit	Finding founder names, company domains, and verifying commercial growth signals.	https://app.tavily.com https://dashboard.exa.ai
Firecrawl + Playwright	500 scrapes + Unlimited local browser	Reading company About pages, storefronts, and live websites to craft 1-of-1 hooks.	https://www.firecrawl.dev (Playwright needs no key)

How to Use Your AI Daily (Zero Prompts Needed)

Your AI has a built-in Natural-Language Intent Router and 16 pre-installed skills. Just talk to it in plain English.

What You Want to Do	Just Say This to Your AI in Plain English...	What Your AI Automatically Runs in the Backend
Learn About AIONUS	'Explain what AIONUS does and how I should pitch it on a call.'	Reads AIONUS_KNOWLEDGE_BASE.md and walks you through our 3 core pillars, target buyers, and FAQ.
Practice Cold Calling	'Practice a 2-minute mock cold call with me as a skeptical CEO.'	Activates aionus-cold-calling roleplay mode, throws realistic objections, and coaches your phrasing.
Scrape Leads & Phone Numbers	'Find me a D2C apparel or multi-outlet clinic founder to call.'	Runs aionus-lead-scraper (Apify + Tavily + Firecrawl), verifies the Founder/CEO, and presents 1 lead at a time.
Draft Cold Emails or DMs	'Write a cold email / Instagram DM for this founder.'	Runs aionus-client-outreach + validates MX records and copy rules via verify_outreach_leads.py.
LinkedIn Warm Outreach	'Pull founders who commented on this LinkedIn post [URL] and draft a comment.'	Runs the 11-skill linkedin-skills bundle (Apify engager scraper + comment drafter + humanizer).
Hand Off an Interested Founder	'This founder is interested and wants a call with Hashim!'	Runs aionus-rias-handoff: automatically emails all lead details to rias@agentmail.to + creates a WhatsApp card.
End-of-Day Wrap Up	'Wrap up my day and send today's report.'	Compiles all leads scraped, calls dialed, and messages sent, emails rias@agentmail.to, and prints a 4-line summary.

The 5 Golden Rules Built Into Your AIONUS Agent

- 1. Strictly Top-Level Decision Makers ONLY: Only reach out to Founders, Co-Founders, Owners, CEOs, Managing Directors (MD), or Principals at right-sized commercial businesses (5 to 50 employees). Never waste time calling or emailing lower-level staff (HR, marketing managers, store managers, interns) or generic inboxes (info@, care@, support@, @gmail.com).
- 2. Zero Pricing Quotes (Escalate All Pricing to Hashim): You never decide or quote prices. Whenever a founder asks 'How much does this cost?', pivot immediately: 'Pricing depends on the exact workflow and scope we build for your setup. Let me set up a quick 10-minute call with Hashim, our Founder, so he can understand your requirements and give you an exact quote.'
- 3. Instant Automated Handoff to Rias (rias@agentmail.to): The moment a founder shows interest or agrees to a call, tell your AI: 'This founder is interested.' Your AI will automatically email the full context to rias@agentmail.to (Rias, Hashim's Executive AI Partner) so Rias can brief Hashim and log the deal, while also giving you a clean WhatsApp card.
- 4. End-of-Day Automated Summary to Rias: When you finish working for the day, simply tell your AI: 'Wrap up my day.' It automatically sends your daily activity log to rias@agentmail.to.
- 5. Never Guess on AIONUS Policy: Your AI has a full company handbook (AIONUS_KNOWLEDGE_BASE.md). If you or a prospect ever ask a question your AI is not 100% sure about, it will never guess; it will tell you to ask Hashim directly.

Backup Method (If You Ever Set Up Without Git)

If Git is not installed on your computer yet, you can also download the ZIP directly from <https://github.com/Hashim1404/aionus-growth-agent>, extract it into your folder, open it in Google Antigravity, and type: Read README.md and run the interactive setup wizard for me.
